tmux

~/.tmux.conf from dotfiles · prefix Ctrl+f (Caps Lock + f) · vi copy mode · mouse on

Panes · Windows · Sessions · Copy mode

Prefix → then one key

Caps Lock is Ctrl on the Mac

CAPS ctrl + F f = **prefix**

release, then one key.
Ctrl+f again sends a real Ctrl+f.

move between panes

H ← J ↓ K ↑ L →

one move per prefix

resize by 5 (Shift)

H ⇐ J ⇓ K ⇑ L ⇒

repeatable: keep tapping

`?` all bindings · `:` command prompt · `t` clock

Panes

prefix +

`"`	split below
`%`	split right
`z`	zoom pane in / out
`x`	kill pane (asks y/n)
`o`	next pane
`;`	back to last pane
`q`	show pane numbers, type one
`Space`	cycle layouts
`{` / `}`	swap with previous / next
`!`	break pane into a window
`←` `↓` `↑` `→`	also move (repeatable)

Mouse: click selects a pane, drag a border to resize, wheel scrolls into copy mode. iTerm2: hold Option to select with the terminal.

Windows

prefix +

`c`	new window
`n` / `p`	next / previous
`1` ... `9`	jump by number (from 1)
`w`	pick from a list
`,`	rename
`&`	kill window (asks y/n)
`.`	move to index
`f`	find by name
`l`	taken by pane-right; use w or a number

Sessions

prefix +

`d`	detach, session keeps running
`s`	pick session from a list
`$`	rename session
`(` / `)`	previous / next session
`L`	taken by resize-right; use s

`tmux new -A -s main`	attach, or create
`tmux ls`	list sessions
`tmux a -t main`	attach to one
`tmux kill-session -t main`	end one

Copy mode (vi keys)

prefix + [

`[`	enter (or wheel-scroll up)
`v` `V` `C-v`	select: chars / lines / block
`y`	copy and leave
`]`	paste
`q`	leave without copying
`/` `?`	search down / up
`n` `N`	next / previous match
`g` `G`	top / bottom of scrollback
`C-u` `C-d`	half page up / down

SCROLLBACK **102400** · NUMBERING **from 1, renumber on close** · ESCAPE-TIME **10 ms** · KEYS **emacs prompt, vi copy** · RELOAD **tmux source ~/.tmux.conf**
